

Driving Circularity in Europe's Industries

Wednesday
21 June
2017

FEAD
Biennial Conference
Paris

Driving Circularity in Europe's industries

Rooftop de La Rochefoucauld (5th floor)
11 rue de la Rochefoucauld, 75009 Paris

Private waste and resources management companies produce high quality materials for re-injection into the economy. Our industry has made the transition from waste to resource managers, thereby providing services going beyond mere end-of-pipe solutions. As professionals, our companies invest and are active across the entire value chain: they cooperate with product designers, they optimise waste collection and sorting in order to reprocess waste into high quality raw materials. In doing so, they play a key role in achieving the best economic and environmental outcomes.

Wednesday, 21 June 2017

- 12h00 – 13h30: Registration FEAD biennial conference
- 12h00 – 13h30: Lunch open to all conference participants
- 13h30 – 13h40: Welcome and opening of the conference by **Jean Marc Boursier**, *President of FEAD*

Session I: **Innovation is key to optimising waste and resources management services** (case studies)

13h40 – 14h45: **o Innovative sorting technologies**
From collection to compounding of plastics: Veolia examples of closing the loop
Gary Crawford, *Vice President - International Affairs, Veolia*
Q&A

o From waste to resource: Maximizing value from feedstock
Producing high-purity phosphoric acid for industry applications from sewage sludge/incineration ash: example of REMONDIS TetraPhos® process
Andreas Rak, *Remondis*
Q&A

o Cooperation with manufacturing industries
Storage, maintenance and cost-efficient dismantling of end-of-life aircrafts in cooperation with the aviation industry: example of Tarmac Aerosave
Philippe Fournadet, *President of Tarmac Aerosave*
Q&A

14h50 – 15h50: **Round table: How to link up all the actors across the value chain?**
Sarah Nelen, *Head of Unit Waste Management and Secondary Materials, DG ENV*
Eric Liégeois, *Team Leader fertilisers, detergents, plant protection products, biocides, plastic and waste recycling activities, DG GROW*
Jean-Marc Boursier, *FEAD President*
Lisa Jennings, *Head & Shoulders and Global Hair Care Sustainability Leader, Procter & Gamble*
Prof. Thomas Lindqvist, *International Institute for Industrial Environmental Economics, Lund University*
Round table moderated by **Peter Kurth**, *FEAD Vice-President*

15h50-16h20: ***Coffee Break***

Session II: **A vision for the future**

16h20-17h00: Keynote by **Gérard Mestrallet**, *President SUEZ*
Concluding remarks by **Jean-Marc Boursier**, *FEAD President*

17h00–18h00: ***Cocktail***

Conference moderated by **Roy Hathaway**, *ESA, UK*

FEAD is the European federation representing the private waste and resource management industry across Europe. FEAD's members are national waste management associations covering 18 Member States, Norway and Serbia. Our companies play a key role in the transition to a circular economy by producing resources which can be re-injected in the economy and by supplying energy. They add value through innovative and cost-efficient collection, sorting, and recycling of secondary raw materials. In doing so, they play a key role in achieving the best economic and environmental outcomes.

FEAD members represent about 3,000 companies with activities in all forms of waste management. These companies employ over 320,000 people who operate around 2,400 recycling and sorting centres, 1,100 composting sites, 260 waste-to-energy plants and 900 controlled landfills. Our companies have an approximate 60% share in the household waste market and handle more than 75% of industrial and commercial waste in Europe. Their combined annual turnover is approximately € 75 billion.

FNADE, the Federation of Waste management and Environmental Services, is the professional organisation representing the waste and resource management sector in France. FNADE brings together the private companies along the waste management chain, including service providers (waste collection, operation of waste installations for all treatments including recycling), builders of infrastructures, equipment manufacturers, research departments and consultancies.

With its 8 trade associations, FNADE represents 232 private companies, 51 000 workers in France, € 11 billion of turnover and 2 000 sites of waste treatment in France, with 75% market share in France for municipal waste. FNADE is a member of FEAD, the European Federation of Waste Management and Environmental Services.
